Research Policies for Ethics and Plagiarism

The goals of this policy is to promote scientific research by providing the code of ethical practices for individual and collaborative work, and guidelines for author, patenting policies, human subjects care for life forms and environment.

1. It focuses on the disciplines that study norm and standards of conduct such as, Arts, Commerce etc. and distinguish between acceptable and unacceptable behavior that suit their particular aims and goals.
2. There should be honesty in collection of data, data analysis and interpretation, methods and procedures, results writing and publication status and other aspects of research where objectivity is expected or required which should not be affect the research which is be open to criticism and new ideas.
3. It should be done confident, sincerely and there should be consistency of thought and action.
4. A proper honor is given to patents, copyrights, and other forms of intellectual property. Do not use unpublished data, methods, or results without permission. Give proper acknowledgement or credit for all contributions to research.
5. Show proper respect and care for life forms when using them in research. Do not conduct unnecessary or poorly designed experiments, relevant laws and institutional and governmental policies
6. The research should not be in the form of misconduct or FFP i.e. "Fabrication, Falsification, or Plagiarism"
7. If any researcher is found to be guilty of plagiarism is liable for severe punishment.
